## Musically Yours

By HED HASTEN

## NEW SOUND ON RADIO

If you are one of those who are tired of the indescribably disorganized sound that has in the last few years almost completely replaced music on the air, you may find it comforting to know that you are not alone, for Radio Station CFQC has long shared your weariness and has now implemented a policy of music control that has already had considerable effect upon the sound of the Station. We hope that this will in turn have some effect upon listening habits thereby causing more and more people to demand better music on the air.

We do not arbitrarily decide that one type of music is better than another but we do insist that the performance reasonably concurs with the physical laws governing the organization of sound and with the accepted grammatical rules of music.

Those who feel inclined to defend the current records, released for their so-called teenage appeal, invariably resort to the claim that in the past we've had our share of silly songs. We have no quarrel with that view but feel that we should point out that silly as these songs seemed they were nevertheless patterned or constructed well enough to enable one to orchestrate them attractively.

We will not attempt to explain the reason for such phenomena as rock and roll, its exponents and disciples, although I would venture the guess that the success of this sort of thing is likely in inverse proportion to the amount of general music education.

That brings us to another reason for our present music policy, that of responsibility to our listeners. There is no question that radio is the largest single factor in the listening habits of youngsters. Their future enjoyment of music hinges upon their being able to learn a number of melodies that will in the future have some association, conscious or otherwise, with the past. It is therefore very necessary that melodies are made available for listening. It is also necessary that these melodies be performed well so that the youngster in time learns to tell the good from the poor. Before we become too annoyed at the seemingly atrocious tastes of the teen-ager we should pause a moment to remember that the teen-ager knows only what he has heard and that the record companies that made the records, the Radio Stations that broadcast them and the public that accepted it must equally share the blame.

It is our purpose to explain in future issues of this paper, various points of interest in our programming and to deal with radio music in general.

In concluding this week's column I should like to point out that now as in the past, good music needs the support of the public and that when you hear music on our Station that is to your liking, that you write to CFQC - RADIO, Saskatoon, and tell us of your preferences.

It is our hope that you will be assured that Radio Station has this one policy in regard to music and that is that whatever the type it must be well performed.

**GRANT TO CANORA SENIOR CITIZENS' HOME**  
It is estimated that in 1958 the total capital outlay by business and industry in Canada, which is the job-creating source of capital investment, will be about 13 percent below the 1957 level.

**Here's a happy flavor combination: BANANA NUT LOAF**  
This loaf is a happy combination of banana and nut. It is a delicious treat for all ages. It is a healthy and delicious treat for all ages. It is a healthy and delicious treat for all ages.

## Give vocational training

Unemployment this winter may mean a better job than last winter for some Saskatchewan workers. Vocational training courses for unskilled and semi-skilled workers who have become unemployed through seasonal work, of 400 to be opened in Saskatoon in 1959.

The programme, jointly sponsored by the Departments of Education and Labour through the Federal - Provincial Vocational Training Agreement, incorporates courses in motor vehicle repair, carpentry and plumbing, varying in length from six to 12 weeks.

A. J. Doyle, Director of Vocational Education for the Department of Education, commented: "This is a method by which we can get unskilled tradesmen into trades at a higher level. We can get at least one of two new courses added to the programme later in the season."

Taking into consideration that accepted trainees will be out of work, allowances will be made to meet the returning fare from home to Saskatoon. Living expenses, depending on unemployment, most necessary benefits will also be paid.

Vocational Employment Service offices are dealing with information and applications for the training courses and classes will be limited only according to accommodation. Applications must be 18 years or over and must be of Saskatchewan residents in education. Those completing a course successfully will be given appropriate credit towards the Certificate of Labour.

## SMART HAIR DEMANDS SMART CARE

Restor, the fabulous hair treatment can now give you better hair. Restor gives hair the treatment it needs to be healthy and beautiful. It makes your hair shine. It makes your hair look better. It makes your hair look better. It makes your hair look better.

## Pigeon problem solved

The colony of pigeons is a pleasant sound around the second floor of the city but not when the pigeons congregate on the church roof and make so much noise on Sunday mornings that they disturb the serenity of the church.

The Rev. Dillard Brown, rector of St. Luke's Episcopal Church in Washington, D.C., mentioned what to do. Recently he had an inspiration. While some were repairing the roof, he gave them a big life-sized rather made purchased at a novelty store. The workmen left the make in a conspicuous spot. There has been a pigeon on the roof since the time.

## Legislative session to begin February 12

The third session of the 12th Saskatchewan legislature will open in Regina on Thursday, February 12th, according to an announcement made by Premier C. D. Douglas. The second session opened on February 13th last year.

After the Christmas formal opening on Thursday, there will be a routine sitting on Friday. The three sittings will begin in Regina on Thursday, February 12th.

Many of the moves and second order of the address in reply to the speech from the throne will be released shortly, the Premier said.

## Canadian Highlights of 1958

Lake St. Lawrence

The dramatic flooding on July 1st of 20,000 acres along the north shore of the St. Lawrence to form part of the new 100 square mile Lake St. Lawrence, headpond for the adjoining U.S.-Canadian generating stations at Cornwall, was the fulfilment of a 30-year dream to develop power in the International Rapids Section of this river.

Submerged beneath the artificial lake are all or part of 8 communities from Iroquois to Mille Roches and some 275 farms. Relocation involved the shifting of 6,000 people and 325 homes as well as the construction of 477 new buildings, railways and highways, in surrounding townships.

In December, Lucile Wheeler of St. Jovite, Que., climaxed a year of sports successes by winning the title *Canada's Outstanding Woman Amateur Athlete* for 1958. Her double victory in the World Ski Championships held last February in Austria pushed the 23-year-old champion into national prominence.

On May 12th Blackfoot Chief James Gladstone became the first Indian Senator in Canada's history. The 70-year-old rancher from Alberta took the oath of allegiance in cowboy coat and striped trousers, posed happily afterwards in his traditional dress against Ottawa's Parliament buildings.

On April 5 at 31 minutes past 9 on a misty grey morning a mighty explosion whipped the foam-flecked waters of Vancouver's Seymour Narrows into a 1,500 foot fountain tossing huge boulders into the air like pebbles and destroying forever the age-old navigational hazard of twin-peaked Ripple Rock, graveyard of a hundred ships and the men

who went down with them. The blast was the spectacular end of a bold enterprise which was 5 years in the planning and preparation; as the boiling waters slowly settled back, the destruction of Ripple Rock took its place as one of the great engineering feats of our time.

### Farmers plan mammoth petition for Ottawa

The organization of a mass delegation to Ottawa to press for deficiency payments on Western grain is now in full swing throughout Saskatchewan. More than 1,000 local committees have been set up and it is expected that thousands of signatures for a mammoth petition regarding deficiency payments on wheat, oats and barley, marketed during the crop years 1955-56, 1956-57 and 1957-58. Petition forms are now in the mail to these committees.

Local committees which will circulate the petition will be representative of the Saskatchewan Wheat Pool, the Saskatchewan Farmers Union and other major farm organizations. All farm groups are co-operating in the drive for signatures and for financial support to send the mass delegation to Ottawa. In most communities, business and professional men will also be taking part of the campaign.

A series of large public rallies at key points in the province have been arranged, featuring advertising, television and radio programs have been organized for presentation early in January. With the campaign in full swing, more than 15,000 farm people and others will be taking part.

Saskatchewan Wheat Pool and Saskatchewan Farmers Union delegates at their respective annual meetings, instructed organization of a mass delegation to Ottawa to press for deficiency payments.

Following meetings between the major farm organizations, the following petition was drafted: WHEREAS the most index of

### Use for discarded nylons

What happens to those nylon stockings when you feel you can no longer wear? Are they thrown out and with the garbage? If so, you should know that they can still be put to use in a worthy cause.

In Japan there is a government agency called "The Women's Welfare Service of Japan," which helps find employment for many women, particularly widows who must support themselves and their children. One method is to make full and knee length stockings from slightly damaged ones, intended to look like new socks for men, women and children, made by unraveling the damaged hosiery and reweaving them, pretty coverings; small stuffed toy animals given to the children made from the unravelled portions. Unusable parts of stockings are made into nylon yarn from which cushions, mattresses and shoulder pads are made.

Twenty-one workshops employ some 120 widows and 1,000 women work in their homes.

If you wish to help these unfortunate women in Japan, save your damaged nylons, ask your friend to save them, and send them in five or ten-pound parcels to:

Women's Welfare Service of Japan, 5-5-chome, Haranachi, Tokyo, Japan.

Send only clean (unused), material, and write "Gift" and "No commercial value" on the outside of the parcel and on the destination slip. —The War Cry.

### WHY BE AFRAID?

Fear can spoil life for children and grown-ups. The person who fears everything from an insect to thunder can miss a great deal of enjoyment and happiness. It was if children are taught to analyze their fears and most things fall apart when they are closely examined. A child will never be frightened by threats of the bogymen, Gollitho and darkness should never be used as punishment or a fear may develop that will last into adulthood.

Plus \$1.00 for shipping and handling. Please send your money order or check to: Misses' Pattern Dept., Department P.P.L., 60 Front Street, W., Toronto.

15-year-old Gail Adams from Drumheller, Alta., walked away with the *World When Queen* title at the '58 Royal Winter Fair. Britain, France, the United States and Australia were among the countries participating in the international competition. Gail won the award with a sample of disease and drought resistant Chinook wheat.

Princess Margaret got her first glimpse of Canada in '58 with a summer tour of 8 provinces. In Nova Scotia she chatted animatedly with fishermen from Digby's fleet who accepted a rare blue scallop shell as a pretty memento of the occasion.

National Film Board of Canada Photos.

## OLD OAT VARIETIES TO FIGHT NEW RUST

Two older oat varieties are expected to be useful breeding material for plant breeders trying to find a type resistant to the new forms of stem rust.

Search for a variety with complete resistance began when two new varieties of oat stem rust, caused by the *P. graminis* and *P. triseti* races, were introduced into the eastern Canada in 1937 and 1938. It was ascertained that they would spread.

The staff at Canada Department of Agriculture Research Laboratories, Winnipeg, found that two selections from the crosses between *Princess* and *Hayes*—*Banner* showed resistance to *P. graminis* and *P. triseti*.

There are 15 identified races of stem rust on the North American continent and nine unidentified, one of which grows commonly in Canada. *Clary* and *Shield* are resistant to all races except *P. graminis* and *P. triseti*.

*Clintan*, *Clinton* and *Larch* are resistant to *P. graminis* and *P. triseti*, but all are susceptible to *P. triseti* races, including *P. triseti* which is one of the most prevalent forms of stem rust.

The plant breeders are using the task of making crosses between *Princess* and *Hayes* and *Clary* and *Shield* and also begin testing other varieties and selections. They were fortunate to find selections with superior resistance sooner than they had hoped.

## Treated to be honorable

It was quite a remark overheard in a street car, but it indicated that there are honourable men around.

A young man said: "I am very particular about paying my fare. I took a ticket home three times. I was a swell boy and showed it to other people. I was not in the car when I had not taken it, and I was not in the car when I had not taken it."

His father looked at him and said that he had sold my honour for a nickel. I was not in the car when I had not taken it, and I was not in the car when I had not taken it."

It is a fact that fathers were training their sons in this way when there were fewer disreputable transactions in high places.

Herold and Presbyter.

## Simple rules for farmers

As simple as cutting farm costs that as farmers it may have escaped the attention of some producers is given by G. A. MacBarron of the Prince George, B.C., Experimental Farm.

Land and machinery form half of every producer's cost, and recommending that you.

Plan and budget your labor requirements; keep labor relations good; keep working conditions clean and safe; and plan your expenses.

Use and budget machinery requirements to fit your farming operation, and get the most out of your equipment without running the job.

## Saskatchewan Government protests further freight rate increase

The announced intention of the railway companies to make some date application to the Board of Transport Commissioners for a further horizontal increase in freight rates has been strongly protested by Hon. L. F. McIntosh, minister of municipal affairs, on behalf of the Government of Saskatchewan.

The Government's protest, dispatched by wire to the Prime Minister of Canada on January 14th.

"Previous horizontal freight rate increases granted by the Board of Transport Commissioners have been grossly discriminatory,"

## Servicemen honored posthumously

Additional Saskatchewan place names have been adopted to honor the province's servicemen who gave their lives in the Second World War.

"In the years to come," said Hon. A. G. Kuipers, minister of natural resources, "the many lakes, islands, bays, rivers and localities named after servicemen will serve as their memorial."

In many cases the address of the parents or next-of-kin is not known. It would be appreciated if interested parties would write to the Minister advising of the address of parents, so that the necessary biographical particulars may be had for historical records of the province.

Due to increased development in the north it has become necessary to identify the lakes and other features to facilitate administration and development. The names have been proposed to the Canadian Board of Geographical Names and will be published on future maps of Saskatchewan.

In the Cree Lake area 300 miles north of Prince Albert the following features were named:

Pigeon Lake—after L. 126317 Pte. Gordon L. Pigeon, Canadian Army.

Huntley Lake—after L. 12099 Pte. William Huntley, Canadian Army.

Proven Island—after J. 2241 Pte. Leonard E. Proven, R.C.A.F.

Pitchfork Lake—after L. 124313 Pte. L. Pitchfork, Canadian Army.

Traverse E. Seely, R.C.A.F.

Rainville Lake—after L. 12918 Lt. Sgt. Jules Rainville, Canadian Army.

Reis Lake—after L. 120210 Pte. P. Reis, Canadian Army.

Sandy Lake—after P/O J. 6316 Private E. Sandy, R.C.A.F.

Shaverhuk Lake—after L. 26840 T/4. Metro Shaverhuk, Canadian Army.

Urban Lake—after M. 100770 Pte. R. Urban, Canadian Army.

Thorn Lake—after C. 121348 Lt. Col. Albert Thorn, Canadian Army.

Dumpleton Lake—after R. 225014 Sgt. Richard Dumpleton, R.C.A.F.

Dwyer Lake—after R. 124740 P/Sgt. Peter Dwyer, R.C.A.F.

Bonanza Lake—after L. 85356 Pte. Peter Bonanza, Canadian Army.

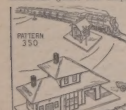

Yaskin Lake—after A. 60085 Pte. John R. Yaskin, Canadian Army.

Aspin Lake—after H. 20325 Pte. H. Aspin, Canadian Army.

St. John's, Nfld., Nfld. Army.

## Railway station

Help Junior build a station and create a building for the train set. Pattern 350, which gives detailed plans, guides and simple directions.

PATTERN 350

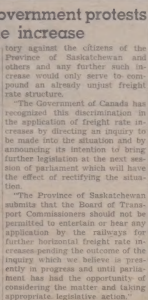

rections is 40". This pattern also includes the Railroad Right-of-Way Project 44 which gives five large pattern sheets for houses, bridges, tunnels, factories and even a church—all for \$1.75.

Home Workshop Patterns, Department P.F.L., 4425 West 4th Avenue, Vancouver, B.C.

## SAFETY MAKES SENSE

Be Extra Cautious around Moving Machinery!

## U. of S. receive grant

A grant of \$7,000 has been made to Dr. Leon Katz, professor of physics at the University of Saskatchewan in Saskatoon by the Research Corporation of New York.

The money will be used for nuclear physics research at the University. It is made available through the Frederick Charles Clibb grant for research administered by the Research Corporation.

## MONEY BUTTER

Blind cup butter with a cup honey. Beat thoroughly. Stir in refrigerator. If a thinner butter is desired use 1/2 cup honey to 1 cup butter.

Dreaming is all right as long as you keep wide awake doing it.

## FROM THE FOUR corners

of the globe where its numbers are working to maintain world peace, the Canadian Army looks back on another year of progress and achievement. Soldiers digging in during action and winter training exercises in Canada's northern harness contrast strongly with Canadian patrolling Egypt's Sinai desert on camel over terrain inaccessible to most cars. Canada's recently purchased "Lash" light aircraft designed for artillery support and liaison work is backed by the "Shobak,"

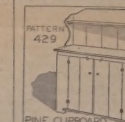

## HOUSING

Housing units started in October were up 27 percent over a year earlier at the exceptional figure of 14,712 for the month, holding the 36-month gain over last year to 28 percent with a record 340,799 units more than for any full year. Completions in October also soared over last year with a gain of 26 percent to bring the increase for the 36 months to 24 percent with a record 1,747,423 units. And lastly, the number of units under construction at the end of October was a fourth larger than last year at 96,460.

## High-Riggers

PATTERN 429

One of the most skilled and spectacular jobs in Canada's colorful logging industry is topping and rigging the spar tree—used to hoist and load heavy timber onto railway cars and trucks.

The high-rigger is an experienced logger, who spends considerable time and thought in selecting the right tree. He looks for it as he scales it, tops it at the 120-150 foot height where trunk measures 14-20 inches in diameter.

PATTERN 429

Cool nerves are essential as high-rigger clings to trunk of topped tree which may sway from 14-20 feet. He then begins rapid descent. Experts limb and top a tree in 1 day; rigging spar tree may take a week.

3-inch spurs which bite deep into tree and sturdy ropes with steel core are part of safety equipment. For their skill and daring high-riggers are paid \$22 a day.

National Film Board of Canada Photo by Gus Lamey.

Canada has 5 1/2 million children under 15 years of age.

Canada needs 38 thousand new classrooms in the next five years and

8 thousand new teachers, immediately in order to give these children a proper education.

Canada's future depends upon our making sure that every boy and girl is assured the right to a complete education. Take an important step toward helping to meet this need by writing for the real booklets, "Education for the 60's," available at the Crowds, Box 200, Station D, Ottawa.
